- Materials:
 - PVC body/connections
 - Stainless Steel spindle, nuts and bolts
- Recommended for use at 50PSI
- **Note:** 150mm also available (pictured at top) in polyurethane body and stainless steel gate.

The easy to use Push/Pull valves from K&T Enterprises, are used extensively in the building, piggery, fish farm and wine industries. The valve mechanism allows for an unobstructed flow of your produce, liquid based waste or fish to swim through without blockage or damage. The push/pull valves are constructed from durable materials designed to withstand varying climates and are available directly from K & T Enterprises.

The Three Way Valve.

A diverter valve for use on septic drainage systems or for any re-routing requirement. Easy operation requires one push or pull to redirect liquid to an alternate flow.

Available for 25mm, 40mm, 50mm, 80mm and 100mm pressure pipe.
